

# EdTech

## Our School

Rochelle Zell Jewish High School offers students, staff and faculty a range of technologies designed to support excellence in teaching and learning. Classroom technology includes interactive SMART Boards and document cameras. In 2020 we opened the Schechter/Bernat Family Innovation Lab. The Innovation Lab supports our STEAM (Science, Technology, Engineering, Art and Math) elective by providing flexible space for students to work and specialized equipment, such as 3D printers and cutting machines.

## Bring Your Own Technology (BYOT)

To offer more personalized student-centered learning, Rochelle Zell has a BYOT policy. Students are encouraged to bring their own device for educational use under the direction of a teacher or administrator. Laptops are preferred as they support software that may be required at all levels. Chromebooks, Android Tablets and Apple iPads are light and portable and may work in certain situations but are limited in functionality.

## At Home

Rochelle Zell students and families have access to numerous resources to continue and support learning off campus.

**Office 365:** Students receive school email accounts in addition to multiple downloads of the full Microsoft Office Suite for use on personal devices.

**Google Apps for Education:** Google education accounts provide additional resources to students beyond Drive, Docs, and Sheets.

**Canvas:** Course sites are accessible to students on Canvas. Parents may also create an account to view course and activity sites.

**PowerSchool:** Our school database allows for attendance and grade tracking 24/7. Parents may also sign-up to have weekly or monthly grade reports sent via email.
